ACE012c – Replacement of the entrance fence and adding a new pedestrian gate at Whiteman’s Green allotment.

1. Background

It has become very apparent that the fence at the entrance of Whiteman’s Green allotments needs replacing and to facilitate access to pedestrians it has been decided to add a new palisade gate along the same fencing area.

2. Costs

Paul requested a quote from Peter Hopgood for the work to be carried out at the entrance of Whiteman’s Green allotment.

The quote covers for the supply and replacement of the fencing at the entrance of Whiteman’s Green allotments and for the installation of a new pedestrian gate (palisade gate) as described below:

- To supply and fit a palisade gate, complete with fittings and posts
- 3 bays of cleft chestnut post and 2 rail fencing

Total cost inclusive of VAT: £558.00

3. Recommendations

My recommendation is to proceed with the quote described above as we have been very satisfied with the previous work done by Peter Hopgood (installation of the new gates at the Cemetery and the fence at the Village Hall).
