

# CUCKFIELD PARISH COUNCIL

Queen's Hall, High Street, Cuckfield, RH17 5EL

## Full Council Meeting 3 September 2020

### FC059 To approve the costs to relocate the container

Photo 1

#### 1. Background

As part of the work to prepare for the development of the nature garden it has been proposed that the container which is located between the car park and the rear garden of the Queen's Hall (Photo 1) be relocated to allow easier access to the nature garden.

The container has an electrical supply running to it which provides the power to light the interior, for the security light and for the plug sockets which are mounted on the gazebo in the Queen's Hall garden.

#### 2. Proposed Work

Photo 2

The plan is to build a new concrete base within the nature garden on the other side of the temporary wooden fencing (Photo 2), then lift and reposition the container onto the new base. The precise location has yet to be determined.

We will also need to first disconnect the electricity supply, then reconnect it after the container has been successfully moved.

### 3. Quotes

I have approached two contractors to obtain quotes for this work. Steve Whiting (who installed the container originally and also laid the base for the gazebo) has quoted £950 to lay a new concrete base and move the container onto it (Annex 1). A representative of **PDP Services Ltd.** (who laid the cable to the gazebo and installed the plug sockets in 2019) visited the site on Wednesday 26<sup>th</sup> August and has given me a verbal estimate of £400 to carry out the required electrical work (I am currently awaiting their written quotation).
