

# CUCKFIELD PARISH COUNCIL

The Queen's Hall, High Street, Cuckfield, RH17 5EL

## **Proposal for implementation of Traffic Management scheme on London Lane, Cuckfield**

Detailed below is a summary of the requirements and costs associated to implement the proposed one-way traffic management scheme along London Lane from 15<sup>th</sup> June until 20<sup>th</sup> September 2020.

### **Traffic Data**

We can continue to use SID to monitor traffic as we have been doing, which will give us the volume of traffic using London Lane.

Alternatively, we can ask Wilbar to complete a monitoring exercise:

To undertake a 7-day speed/flow survey at the 7 sites as attached for £375 + vat.

It may be an idea to get a survey in before the one-way working is laid out so there is a current base line. If you would like us to do it we could install our equipment Sunday 7<sup>th</sup> to get a full week before the 15<sup>th</sup> start date.

### **One Way Traffic System**

Wilbar have provided a revised quotation for the supply and installation of the traffic management signs, sign frames, cones etc. to enable the one-way operation in London Lane between Glebe Road and Chatfield Road and clearing away after 3 months at £1,110. As discussed previously the Traffic Signs Manual requires that where no operatives are working on site that the traffic management is checked on a daily basis which would be an additional charge of £75 per day (approx. 90 days = £6,750). This would be required for the installation to be covered on the 6-10 Traffic Management Public Liability Insurance.

Alternatively, there may be an option for Cuckfield Parish Council to 'hire' the signs, cones etc. from 6-10 Traffic Management and arrange for the installation to be covered on the council's public liability insurance. The PC would then undertake the daily inspections and contact 6-10 as and when maintenance to the installation is required. This option would be £1,110 installation / clear away plus £75 per maintenance callout. The PC may wish for 6-10 to undertake a weekly, or other time period, inspection at £75 per visit. There would also be a nominal charge should any of the signs, cones etc. go missing or be damaged beyond repair, this would be discussed and agreed at the end of the works. All costs + vat.

## **Parking Restrictions**

Wilbar will provide a quote to install equipment required to implement the parking restrictions required by WSCC as a condition of approving this scheme.

## **Cost Summary**

<b>Activity</b>	<b>Cost</b>
Traffic Data Capture	£395
Implementation of the one way system	£1,110
Daily Checks of Traffic Management system (required by law)	£75/visit
Parking Restrictions	TBA
