Improvement works

We are writing to give you plenty of notice about planned improvement works to the Fairbridge Way roundabouts north of Burgess Hill (see location plan above).

Throughout the works a route will be maintained in and out of Burgess Hill. Access to the Burgess Hill Household Waste Amenity Site and businesses along Fairbridge Way will also be maintained. Temporary traffic lights will be used from time to time during the works to maintain access and to keep construction workers safe.

Construction is planned to start in February 2022 and is expected to take 6 months to complete. Further information is available on the project website: www.fairbridgewayroundabout.co.uk
